1. The tunnels on the new line between Pernik, Voluyak and Sofia are to be ten meters wide and eight meters high to provide for double lines.
2. An alternative line between Pernik and Sofia is being planned. This will circumvent the heights of the village of Vladaya and thus spare the extra locomotives which have always had to be provided for this particular section of the line. It will be 42 kilometers in length.
3. The object of this alternative line is to increase the transport facilities between the Pernik coal mines and Sofia, and thence to the rest of Bulgaria.
